

TERMS AND CONDITIONS

These Terms and Conditions of Use (hereinafter also referred to as “the Agreement”) establish the conditions under which Cardioscience s.r.l., located in Bucharest, Str. Hatmanul Arbore, No. 15-19, Office No. 4, Floor 2, Apartment 209, Sector 1, Unique Registration Code: 38882485, registered at the Registry Office of the Bucharest Tribunal under no. J40/2293/2018, email: office@dahnapp.com (hereinafter referred to as “Cardioscience”) provides its software and services via the website <https://dahnapp.com> or any other sites controlled or operated by Cardioscience, as well as through the "Dahna" mobile application (hereinafter collectively referred to as “the Service”) to you, as a user of the Service (hereinafter referred to as “You” or “the User”).

The Dahna application (Diet According to the Healthy Heart Nutritional Approach) is created and wholly owned by CARDIOSCIENCE SRL.

REGISTRATION. ACCOUNT CREATION

By creating an account as a User of the Service (by providing your email address and setting a password), necessary for using the Service, including the Dahna Application, and by using the Service in any other way, you express your consent to enter into legal relations with Cardioscience, governed by the provisions of this Agreement, in its latest updated version at the date of Account creation, and in this sense, you commit to fully comply with the provisions of the Agreement and expressly and unequivocally accept both the Terms and Conditions of Use (the Agreement), and the Cardioscience Personal Data Processing Policy, which is an integral part of this Agreement. If you do not agree with the Agreement and/or the Personal Data Processing Policy, please delete the Application and refrain from using the Service.

By creating and using the account, the User assumes responsibility for maintaining the confidentiality of account data (username and password) and for managing access to the account, and is responsible for the activity conducted through his or her account.

By registering as a User of the Service, you declare on your own responsibility and guarantee that:

- (i) you are over 18 years old;
- (ii) the information provided by you for registration is accurate, current, and complete;
- (iii) your registration as a User and use of the Service are not prohibited by law.

In the event you violate any of the terms and conditions of this Agreement, Cardioscience

reserves the right to suspend or permanently discontinue providing the Service to you, with or without notifying you in this regard.

Cardioscience reserves the right to modify this Agreement, with such changes coming into effect by updating the Agreement. PLEASE READ THIS AGREEMENT CAREFULLY AND CHECK THE TERMS AND CONDITIONS PERIODICALLY TO KEEP UP TO DATE WITH ANY CHANGES.

DEFINITIONS

The terms used in this Agreement shall have the following meanings:

“Dahna” (Diet According to the Healthy Heart Nutritional Approach) hereinafter also simply referred to as “the Application,” represents software, which includes its graphical interface, over which Cardioscience holds all copyrights, designed to be run on a mobile computing device, such as a smartphone, and which is distributed by Cardioscience, depending on its own business policies, through online stores (App Store, Google Play, Amazon, Microsoft Store), via the website www.dahnapp.com (hereinafter referred to as “the Site”). The Application has two versions – a free version and a monetized version (with money). The free version of the Application does not grant the User access to all functionalities of the Application, while the monetized version of the Application is characterized by the presence of additional functionalities (for example, a functionality that can estimate the risk of cardiometabolic disease, evaluation of renal function, calculation of healthy life minutes by following menus from the Application, benefits and discounts at Dahna partners).

“User” means any individual over 18 years old who uses the Service (the software and services provided by Cardioscience through the App Store and Google Play platforms as well as the website <https://dahnapp.com> or any other sites controlled or operated by Cardioscience, including through the Dahna Application for mobile devices).

“Service” means the ensemble of services and/or products (e.g., the Dahna software) offered by Cardioscience for use by the User through the App Store and Google Play platforms as well as the website <https://dahnapp.com> or any other sites controlled or operated by Cardioscience, as well as through the Dahna Application for mobile devices.

“User Content” means all and any information, data, photos, text, graphics, video, and other materials that a User transmits to Cardioscience as part of his or her registration as a User of the Service or which are posted by the User as a result of using the Service.

“Partner” – means any professional and/or legal entity that conducts commercial or other activities and has a contract with Cardioscience, who are listed under this category by Cardioscience.

“Cardioscience” means the holder of all rights regarding the Service, including copyright and any other intellectual/industrial property rights regarding the Service/Dahna Application, including regarding the Dahna content and/or the computer programs associated, and Partners and Users will not dispute or contest, directly or indirectly, during the course of contractual relations and after the termination of the Agreement, any of these rights nor their validity.

MINIMUM TECHNICAL REQUIREMENTS FOR USING THE APPLICATION

The Dahna application can be downloaded and installed on smartphones with Android and iOS operating systems from their respective stores, Google Play for Android and iTunes App Store for iOS. Operating systems and internet browsers can behave differently depending on factors related to their differentiation, and Cardioscience does not guarantee the full functionality of the Application. Please be aware that there may be occasional malfunctions, which Cardioscience will attempt to rectify as much as possible. Users will be informed about these situations through the communication channels available to Cardioscience. Cardioscience is not responsible for any errors that may occur in using the Application due to malfunctions, errors, or non-compliance with legal provisions regulating the use of services in general, and telecommunications services in particular. As a client, you may have access to the Dahna application through a third organization such as your employer or one of Cardioscience's partners.

GENERAL DESCRIPTION AND PURPOSE OF THE APPLICATION

Dahna is an original application created with medical expertise according to current medical guidelines aimed at adopting a healthy lifestyle by offering a professional, very fast, and efficient way to create personalized Mediterranean diet menus for the prevention of cardiometabolic diseases, with the objective of reducing the risk of cardiometabolic diseases. The application allows the user a quick choice among hundreds of daily menus and hundreds of varied recipes, owned by Cardioscience. The preparation time for a recipe is a maximum of 30 minutes. Menus are automatically personalized by the Application based on the physical characteristics of the User (age, gender, height, weight, physical activity, and health biomarkers). The user chooses the preferred daily menus to follow. Once the menus are established, the Application automatically generates both the list of ingredients that make them up and the necessary quantities. Once finalized, this list can be used for quick, targeted shopping of the ingredients contained from the nearest supermarket. In short, Dahna is a very user-friendly application that can significantly

contribute to improving public health through the adoption of a healthy diet, strongly recommended by medical professionals as effective in preventing cardiovascular and metabolic diseases. All information in the Application is advisory, not mandatory, and does not replace a medical specialist's consultation. The application itself is also intended to be a tool for educating the public and raising awareness of adopting a healthy lifestyle through the use of an appropriate diet to prevent cardiometabolic diseases. The diet and nutrition information included in the Dahna application is documented by Nutrition Guidelines and specialized articles. Currently, this information presented in a language accessible to any user is advisory and not mandatory. The application is for informational purposes only and is not intended to provide therapeutic solutions or assistance in diagnosing. The application is not a medical device. The user declares that they have been informed and agrees that using the Application in no way replaces, for any reason, the consultation of a medical specialist, who is the only competent person to establish a diagnosis and provide appropriate recommendations for the person's health condition. The Application is not in any way a medical opinion or recommendation and should not be considered a diagnostic tool or for therapeutic purposes. For medical recommendations, we advise Users to consult a nutrition specialist and/or a specialist doctor.

APPLICATION FEATURES

Currently, the Dahna application allows Users to access main functionalities such as:

- **Creation of a cardio and metabolic profile** After the User account is created, personal data are entered that create the current cardiometabolic profile, calculate BMI (Body Mass Index), based on this cardiometabolic profile personalized menus are assigned, with their respective recipes.
- **Setting the optimal daily hydration level** An algorithm in the Application customizes the optimal daily hydration requirement, information continuously displayed in the "My Profile" section.
- **Body weight goal** An algorithm in the Application customizes the optimal daily requirement of calories, macronutrients, and micronutrients and assigns menus according to this objective to control the reduction of the Body Mass Index, information displayed in the "My Profile" section.
- **Assignment of personalized daily menus** Based on your own metabolic profile, personalized daily menus are assigned, with the caloric and macro and micronutrients needed each day.
- **Ingredient list generation** After the menus are assigned, based on the metabolic profile, the User selects their favorite ones, adds them to the list, and immediately a

list is created with the ingredients needed, exactly in the necessary quantities, to prepare the recipes that make up the daily menus. With this list, the user goes shopping.

- **Access/View physical activity videos** In the application, short media files with trainer Diana Stejareanu can be accessed, which exemplify/perform physical activities at different levels: beginner, intermediate, advanced.
- **Application use by people with visual impairments** Voice over functionality to use the Application by listening to text-type information by Users with visual difficulties.
- **Sending in-app notifications Through in-app notifications**, the User can be informed about the latest research and recommendations of cardiologists and nutritionists; with the help of these notifications, they are reminded of the next day's menu and the status regarding the objective set in the Application.
- **Estimation of cardiovascular disease risk** The application estimates the risk of cardiovascular diseases for the next 10 years using a SCORE 2 and SCORE 2 OP estimation system for EUROPE, and the Framingham score for the USA.

SERVICE USAGE FEES. PAYMENT AUTHORIZATION

If you purchase any monetized Service, whether a one-time purchase for a month or an annual subscription, you undertake the firm obligation to pay the fees to Cardioscience and authorize Google Play by Google through Google Pay and iOS platform to withdraw the amounts representing the fees from your bank card. The fees for using the Application, in its monetized version, are:

29.99 Euros – for a single period of [12] months, initial promotional price

Or

3.99 Euros, based on a monthly subscription, valid for one calendar month, promotional price

All financial operations and payments made for purchasing the ad-free version of the Application are processed by Google Play through Google Pay and the iOS platform. Fees and commissions charged for these operations are borne by CARDIOSCIENCE, not the Users.

Cardioscience does not have access to, nor does it collect information related to the User's financial transactions. Payment information of the User is stored in the systems of Google Play and the iOS platform, which are also responsible for the security of transactions made with the User's card.

NO PAYMENT CAN BE MADE IN CASH; THE ONLY ACCEPTED METHOD OF PAYMENT IS THROUGH A BANK CARD.

CARDIOSCIENCE reserves the right to discontinue the use of any User account or any password, whether chosen by you or allocated by Cardioscience, at any time, in case of breach of this Agreement or if there are suspicions of fraud.

SUBSCRIPTIONS AND PAYMENTS

Our application offers two types of subscriptions to allow you access to premium functionalities that help you better manage your health: a monthly subscription at a promotional price of 3.99 EUR and an annual subscription at a promotional price of 29.99 EUR. These prices are valid only for the first subscription. For subsequent renewals, subscription prices may vary according to our business objectives.

FREE TRIAL PERIOD

We offer a 7-day free trial period for all new users. This allows you to experience all the benefits of a premium subscription at no cost. If you decide that our subscription is not suitable for you, you can cancel at any time before the end of the trial period to avoid any charges.

PAYMENT METHODS

We accept all payment methods supported by Android and iOS payment systems. Payments are secure and managed through the respective platforms, ensuring a safe and reliable process.

CHANGES TO PRICES AND SUBSCRIPTIONS

We reserve the right to modify the prices and subscriptions offered. Any changes will be communicated via email or in-app notifications well in advance of their implementation. You have the freedom to cancel the subscription if you do not agree with the new terms.

CUSTOMER SUPPORT

For questions or assistance related to your subscriptions, please contact us at office@dahnapp.com or phone 0040723189104. Our customer support team is here to help you.

By subscribing to our services, you confirm that you have read, understood, and accepted the terms and conditions presented here.

AUTOMATIC RENEWAL SUBSCRIPTION

By requesting the Service on a subscription basis, you agree that the chosen subscription will be automatically renewed periodically.

Subscriptions automatically renew at the end of each billing period (monthly or annually) until canceled. To cancel your subscription, follow the instructions provided by the app store on your device. It is important to perform this cancellation at least 24 hours before the renewal date to avoid being charged for the next period.

If you do not notify Cardioscience about the termination of your subscription before the end of its duration (initial or extended), you agree to its automatic renewal and agree that you owe the subscription fee and authorize Google Play/iTUNES to charge the fee and bill you for the renewal period.

The automatic renewal period will be equal to the initial subscription period, unless you are communicated a different period at the time of the subscription purchase. If we do not inform you of a price change before the automatic renewal of your subscription, the fee for the new subscription will be equal to that for the immediately preceding subscription period, excluding any previous promotional price and discount, which will no longer apply to the renewal rate.

Cardioscience may occasionally offer a free trial period for testing the monetized version of the Application. If you register for this free trial, upon expiration of the free trial period you will begin using the paid subscription and authorize Google Play, respectively iTunes, to withdraw the subscription fee from your bank account, unless you inform Cardioscience that you no longer wish to use the subscription before the end of the free trial period.

ACCESSING THE DAHNA APP

The functioning of the Application is conditioned by an internet connection (WIFI or mobile data) of the phone and the optimal functioning of the device on which the Application runs. Cardioscience assumes no obligation and will not be liable for the Users' inability to use the Application due to the User's device not having Internet access or running out of battery.

User access to the Application is achieved through the authentication method provided in the Application, as specified in the dedicated stores Play store – for Android, respectively iTunes – for iOS. Two usage versions of the application are offered for download: the monetized version at the price displayed in the online store and the free version.

The permissions addressed are mandatory requirements requested by the operating systems, and Cardioscience is not responsible for unauthorized, incompatible with the above-mentioned purpose, abusive or illegal use of the data mentioned, the User expressly declaring that they exonerate Cardioscience from any such liability by downloading the Application and expressing consent to access the data mentioned above.

To ensure the security of your data, we recommend not disclosing your registration data to anyone. Also, if you have suspicions about the disclosure of your registration data, we recommend changing your account password.

Registration as a User implies acceptance of the provisions of the Terms and Conditions (Agreement) and the Personal Data Processing Policy of Cardioscience.

After creating the account, for the provision of services offered through the Application, personal data will be collected, as mentioned in the Personal Data Processing Policy, such as, but not limited to: valid email, geolocation (in the case of geolocation, you can change the settings on your device, but there is a risk that certain options of the Application may cease or modify their functionalities - for example, the future Home Delivery functionality).

For optimal functioning of the Application, it is necessary for the user to allow it to access certain functions of the phone, as requested through system messages within the Application, such as activating notifications, location (GPS), and other functions that may be added over the course of the Application's development, according to the message received through it. It is absolutely presumed that the User has expressly consented to the use of the new functions of the Application if the User continues to use the Application after its modification by adding these functionalities.

PROCESSING OF PERSONAL DATA. INFORMATION REGARDING ACCESS, COLLECTION, USE, AND TRANSMISSION OF USER DATA

To be informed about how your data is processed, please review the Personal Data Processing Policy.

LINKS TO THE DAHNA APPLICATION

You may link to the Application as long as you do so in a fair manner that does not damage Cardioscience's reputation or take advantage of our reputation for personal gain.

You may not create a link in such a way as to suggest any form of association, approval, or endorsement on our part when none exists. You must not establish a link to the Application on any website that is not owned by you. We reserve the right to withdraw linking permission to our website without prior notice.

If you wish to use content from the CARDIOSCIENCE website other than the situations above, please contact us via email at office@dahnapp.com

INTELLECTUAL PROPERTY RIGHTS. USE OF THE SERVICE

Subject to the terms of this Agreement, Cardioscience authorizes you to use the Service for personal, non-commercial purposes. You do not have the right to remove any copyright, trademark, or other proprietary notices that have been placed in the Service.

You agree and warrant that your use of the Service will comply with the license, permissions, and restrictions herein, will not infringe on the rights of any third party, nor breach any contractual or legal obligations. Additionally, you assume the obligation to comply with all applicable laws and regulations concerning the Service or its use by you, and you will be solely responsible for any legal obligations violated in using the Service.

In order to use the Application and access the Service in general, obtaining the equipment and bearing the cost of the necessary telecommunications services, as well as all associated fees (e.g., purchasing a smartphone with a functional operating system that includes an internet browser, necessary licenses, and ensuring an internet connection), are the exclusive responsibility of the User.

We reserve the right to implement any changes to the Service at any time, with or without notice. You agree that certain actions by Cardioscience may affect or prevent you from accessing the Service at certain times and/or in the same manner, temporarily or

permanently, and you agree that Cardioscience assumes no liability regarding such actions or their outcomes, including, but not limited to, the deletion or inability to make available any content of the Application or Service.

The Application, its component elements, graphic elements, and its content, the content of the website <https://dahnapp.com> or any other sites controlled or operated by Cardioscience, such as, but not limited to, photographs, texts, animations, and all works integrated into the Application and/or websites are protected by copyright and related rights, as well as intellectual property rights belonging to Cardioscience or third parties who have authorized Cardioscience to use them, unless otherwise specified. The User understands that they have no rights over them, except for the limited right to install and use the Application, according to this Agreement.

The name “Dahna”, the Dahna logo, are registered trademarks by Cardioscience. All rights reserved.

All company names, registered or not, service/product/trade marks, trade names, logos, and emblems are protected by applicable intellectual property laws. The User is prohibited from using any text, image, mark, logo, compilations (collection, arrangement, and assembly of information), data, other content, software, and materials displayed in the Application belonging to CARDIOSCIENCE, its partners, or other third parties, without prior written consent from the holders.

You may download and use the Application exclusively for personal, non-commercial purposes, for which CARDIOSCIENCE grants you a non-exclusive, limited license. Thus, the following are prohibited:

- Using the Application/Service for illegal purposes;
- Selling, exporting, licensing, reverse engineering, modifying, copying, redistributing, uploading, posting, transmitting, distributing, or otherwise exploiting the Service or any part of the Service or Application without prior, written consent from CARDIOSCIENCE;
- Creating derivative works, sublicensing, lending, or using the Application, the software underlying the Application, or any other components thereof for other purposes;

- Otherwise making the Application available for a third party to copy.
- Republishing materials uploaded to the Application (including republishing on various online and/or offline sites or platforms);
- Publicly displaying any materials uploaded to the Application; reproducing, copying, or exploiting the materials uploaded to the Application for commercial purposes;

USER CONTENT

The information you transmit as part of your registration as a User of the Service and any data, photos, text (e.g., comments, suggestions, ideas), graphics, video, and other materials you send to Cardioscience or post as a result of using the Service ("User Content"), remains your intellectual property. Without limiting the foregoing, you agree that Cardioscience may retain copies of all registration information and User Content, which it may use as reasonably necessary for or as a result of the operation of the Service, as described in the Agreement and the Personal Data Processing Policy, and in this regard, you grant Cardioscience an exclusive, unlimited, transferable, perpetual, irrevocable right to use, adapt, integrate into other works the materials you transmit, for any purpose, to publish, distribute, publicly display, and use the User Content in connection with the Service, and in accordance with the Personal Data Processing Policy of Cardioscience.

It is prohibited for the User to post information that is vulgar, threatening, or indecent, as well as content that violates the rights of a third party or contains viruses or other harmful materials. Texts/Information/images and in general any materials posted within the Service must: (i) not include licentious, immoral, or antisocial content; (ii) not damage in any way the marks, products, or image of Cardioscience; (iii) not contain defamatory details, words, or symbols that are generally offensive or directly offensive to people of a certain race, ethnicity, religion, sexual orientation, or socioeconomic group; (iv) not contain threats to any third party, place, business, or group, not violate the privacy, right to private life, and/or other rights of any third party, firm, or entity, and not otherwise violate applicable legislation and regulations; (v) be realistic, without texts, logos, or any other materials involving copyright or any other protected rights that do not belong to the User.

RELATIONSHIPS BETWEEN USER AND PARTNERS

The services offered by PARTNERS are subject to the terms and conditions of the respective Partner and can be purchased by you directly from them, only by your acceptance of the terms and conditions belonging to that Partner.

We select our Partners, whose services are presented through the Application, with utmost care and conduct periodic quality checks. However, CARDIOSCIENCE provides no warranty, either express or implied, and assumes no legal liability for the accuracy, completeness, timeliness, quality of services, or third-party recommendations. Cardioscience disclaims any responsibility or liability regarding any transaction between you and any third-party service provider.

In the event of a dispute between you and any third party, you agree that you cannot claim any direct or indirect damages from Cardioscience arising from such a dispute.

Any requests, information inquiries, or complaints regarding the services provided by PARTNERS should be addressed to them, or if you decide to send them to CARDIOSCIENCE, they will be redirected by us to the responsible person. For more information and details, we recommend accessing the Terms and Conditions of each Partner, available on their websites.

CARDIOSCIENCE's Liability in Relation to Partners

CARDIOSCIENCE acts as a third party in relation to the User regarding the services or products provided by Cardioscience Partners or any other providers to which Cardioscience facilitates access or which provide services to Users.

Throughout the development of the Application's activities and functionalities, Cardioscience may enter into partnerships (permanent or temporary) with other service providers, not included in the Cardioscience Partner Network, and you, as a User, will have access (free or paid) to their services through the Application.

Cardioscience is not responsible and cannot be held liable for the quality of services rendered or products provided by its Partners or other third parties. Also, discounts, offers, and promotions are provided directly by Partners or third parties, who retain at all times the status of provider/service provider and assume the obligations associated with the delivered products/services provided (e.g., conformity, warranty, respecting the User's rights as a buyer, acceptance, and service delivery conditions).

Cardioscience does not assume responsibility for the content and offers of web pages not owned by it, to which links from the Application or Service may lead, nor for contents

published by Clients on any other sites controlled or operated by Cardioscience (e.g., Reviews, various comments, etc.).

Considering current legislation, Cardioscience has no responsibility concerning:

- Incorrect information provided by the User. The User has the possibility to correct personal data at any time either directly from their account or by contacting Cardioscience in this regard, using the contact details available on our website or in the Application;
- The possibility of contracting viruses through using the Service/Application or by receiving informational or promotional emails;
- Inconveniences created by the interruption of access to the Service or in the Application due to the internet service provider (ISP);
- The content or nature of the sites through the links which a User accesses the Application.
- The quality of services/products provided or rendered to Users by various Partners or third parties.

LIMITATION OF LIABILITY REGARDING THE CONTENT OF THE APPLICATION

The User agrees to access and use the Application/Service at their own risk. Therefore, Cardioscience, its affiliates, its employees, agencies, or any other party involved in the design, development, management, and maintenance of the Application/Service cannot be held liable for any direct or indirect damages, especially for material damage, loss of data or programs, financial loss, resulting from access or use of the Application/Service, or from the inability to use the Application/Service or any material published in the Application/Service or added by other users.

The entire content of the Application/Service must be taken "as is," with the User being aware that no warranty is expressly or implicitly provided by Cardioscience such as, but not limited to, accuracy, completeness, timeliness, or certainty of any content made available through the Service/Application, any warranties of merchantability, association with a particular purpose, and non-infringement of rights of persons. Users are responsible for verifying any information before relying on it. Use of the Application/Service is at the sole responsibility of the User.

Cardioscience makes all efforts to provide you with access to correct information but cannot guarantee that the Service/Application is error-free nor that there will not be errors or omissions in its content. Also, we cannot guarantee that the Service/Application and its content will always be accessible without interruptions. The User understands and agrees that Cardioscience will not be responsible in case the Application and/or Service cannot be accessed, regardless of the reason or duration of the inability to access.

Also, we will not be responsible for any damage created due to a virus, denial-of-service attack, or distributed denial-of-service attack, nor from any other type of technological material that could infect your equipment (computer or mobile terminal), your IT system, your data as a result of using the Service or other websites to which there are links on our website.

Cardioscience does not guarantee that the Service and/or Application will be secure or free from viruses. The User is responsible for configuring their IT systems for access to the Service/Application and for using their own antivirus software. You must not misuse the Application by introducing viruses, Trojans, worms, or other materials that could cause technical problems. You must not attempt to gain unauthorized access to the Application or allow it to be accessed by a third party.

Denial-of-service or distributed denial-of-service attacks are not permitted. By breaching this provision, you would commit an offense under Romanian law, and we will report any such breach to the competent investigative authorities and will cooperate with the authorities by disclosing your identity to them. In the event of such a breach, your right to use the Application and the Service ceases immediately.

The Application may have an interactive functionality that allows Users to share information about menus/the cardiometabolic profile with friends/third parties, for example, in chat areas and blogs. The User will use this functionality of the Application at their own risk.

Cardioscience does not edit or control the User Content that is posted or distributed in various interactive areas of the Application and/or Service (blogs/chats) and will not be responsible in any way for the User Content. Cardioscience will not be responsible for any loss or damage that any person might suffer as a result of using these interactive functions (chat/blog/forum) of the Application. Users are solely responsible for any damage caused

by their activity. However, Cardioscience will make all efforts to remove materials posted that do not comply with this Agreement, although it has no obligation to do so.

The Application does not represent in any way a medical opinion or recommendation and should not be considered a diagnostic tool or for therapeutic purposes. The Application does not replace in any way and for any reason the consultation of a medical specialist or nutrition specialist, who is the only competent person to establish a diagnosis and provide the appropriate recommendations for the health status of the User. For medical recommendations, we advise Users to consult a doctor/nutrition specialist.

A healthy lifestyle involves not only adopting an appropriate diet but also regular physical exercises, giving up harmful habits (smoking, alcohol consumption), all balanced with moments of sleep and rest. You agree that your activities regarding adopting a diet and physical exercises involve risks, which may include the risk of bodily injury or death, and you assume these risks. You should consult a nutrition specialist or your doctor before starting or changing any diet or physical exercise program you undertake and acknowledge that you have been informed about the need to obtain such consultations. The Service CANNOT be used by pregnant women EXCEPT under the guidance of a family doctor.

Cardioscience does not assume any obligation regarding (a) the suitability of your engagement in a weight loss program; (b) the results (or lack of results) obtained by your use of the Service; and (c) any health issues arising in connection with your use of the Service. In no case can Cardioscience be held responsible for any death or bodily injury you suffer or cause to any third party, in connection with your use of the Service or any diet, exercise, or other activity you undertake in connection with the use of the Service.

MODIFICATION OF TERMS AND CONDITIONS

Cardioscience may revise the terms and conditions of use, as well as any other applicable terms, at any time by modifying the relevant pages. Terms and conditions can undergo any change, without prior notice, being made known by direct display in the Application and/or on the websites operated or controlled by Cardioscience. Please check the relevant pages to learn about any changes to the terms and conditions of use, as such changes will apply to you from the moment of the update. If you use the Application/Service after a change, it is presumed that you have accepted the modified Terms and Conditions.

Cardioscience reserves the right to update the Application at any time and to change its content. However, please be aware that the Application may be outdated at the time of your viewing and we have no obligation to update it in real-time.

Cardioscience makes every effort to provide you with all versions of the Terms and Conditions applicable to you. However, if you do not find the version that interests you, please contact us at any of the contact details on the site, and an operator will provide you with any version of the Terms and Conditions via email as soon as possible.

COOKIE POLICY

Regarding the use of cookies, please go through the Cookie Policy, available here ([link](#)), which forms an integral part of this document.

SUPPORT AND ASSISTANCE

CARDIOSCIENCE provides Users with a support team during the period of use of the Application/Service. The support service can be accessed on working days (Monday to Friday, excluding public holidays) between 9.00 and 18.00, at the contact number 0723189104. The support team answers questions related to the functionality of the Application and questions related to the benefits of CARDIOSCIENCE or over which CARDIOSCIENCE has control.

The support team cannot respond to questions/issues related to services not provided by CARDIOSCIENCE, more than the information already available on the Application, but can redirect you to the contact point of the Partners who have the necessary information and can provide this information.

APPLICABLE LAW

Romanian law is applicable to the Agreement as well as any aspects related to or in connection with the content of the Agreement. By accepting the provisions contained in these Terms and Conditions, you agree that any aspect or dispute arising from these terms and conditions will be under the jurisdiction of the competent courts in Bucharest, Romania.

CONTACT

If you have any questions regarding the content of this Agreement, please contact us at the email address office@dahnapp.com
